Welcome to June! This is the month for the Auction, so don't forget all your KEGabuck\$. There will be some really cool stuff this year.

Right now, there is nothing really new out of Microsoft. If you have Windows 8.1, make sure to install the Windows 8.1 upgrade, especially if you have a desktop. It will make it easier to use with a mouse/keyboard.

If you are thinking of getting a new Windows cell phone, you will probably want to wait until Windows Phone 8.1 comes out. It has a lot of new features that will make using Windows Phone a lot easier, though there is still the issue with the lack of apps. They are trying to change things so that will not be as much of an issue.

Here is an article on basic operation of a DSLR from CNET, which was pretty informative. <http://www.cnet.com/how-to/how-to-set-up-your-slr-for-beginners/?ttag=fbw1>

For those of you that remember World War II, here is an article about the reverse engineering of the equipment used during D-Day. <http://www.popsci.com/article/technology/reverse-engineering-technology-d-day?dom=PSC&loc=topstories&con=reverseengineering-the-technology-of-dday>

Interesting new tech of the week: the new Dragon from SpaceX which when operational will start transporting people to the International Space Station among other locations. <http://www.popsci.com/article/science/week-numbers-turning-light-matter-new-dragon-spacecraft-and-more?dom=PSC&loc=recent&lnk=1&con=the-week-in-numbers-turning-light-into-matter-a-new-dragon-spacecraft-and-more>
